INTEGRATED FACILITY SECURITY AND MANAGEMENT

Building through a single platform and facility security provides management.

It allows system integration and operation over existing suitable hardware.

www.miateknoloji.com

Facility management under one platform.

- Access and secure area management
- Personnel tracking system
- Visitor registration and pass system
- Vehicle recognition, access and parking
- Cafeteria management and payment
- Fire and emergency management
- Energy efficiency measurement
- In-plant device (lighting, air conditioning, elevator, fire, etc.) management
