MIA
TEKNOLOJİ

SAFE PUBLIC TRANSPORT

It detects anomalies with image processing and deep learning technologies by monitoring the inside of the driving cabin and the bus in public transport.

It provides a healthy travel experience by ensuring the safety of the bus and its users.

www.miateknoloji.com

Public transport journeys are now safer.

In the driver's cabin;

- Eye tracking and blink detection
- Fatigue and sleep detection
- Smoking detection
- Detection of looking away from driving
- Phone usage detection

In the passenger cabin;

- Fight and argument detection
- People counting and density sensing
- Age and gender analysis
- Accident detection such as falling
