INVESTOR PRESENTATION

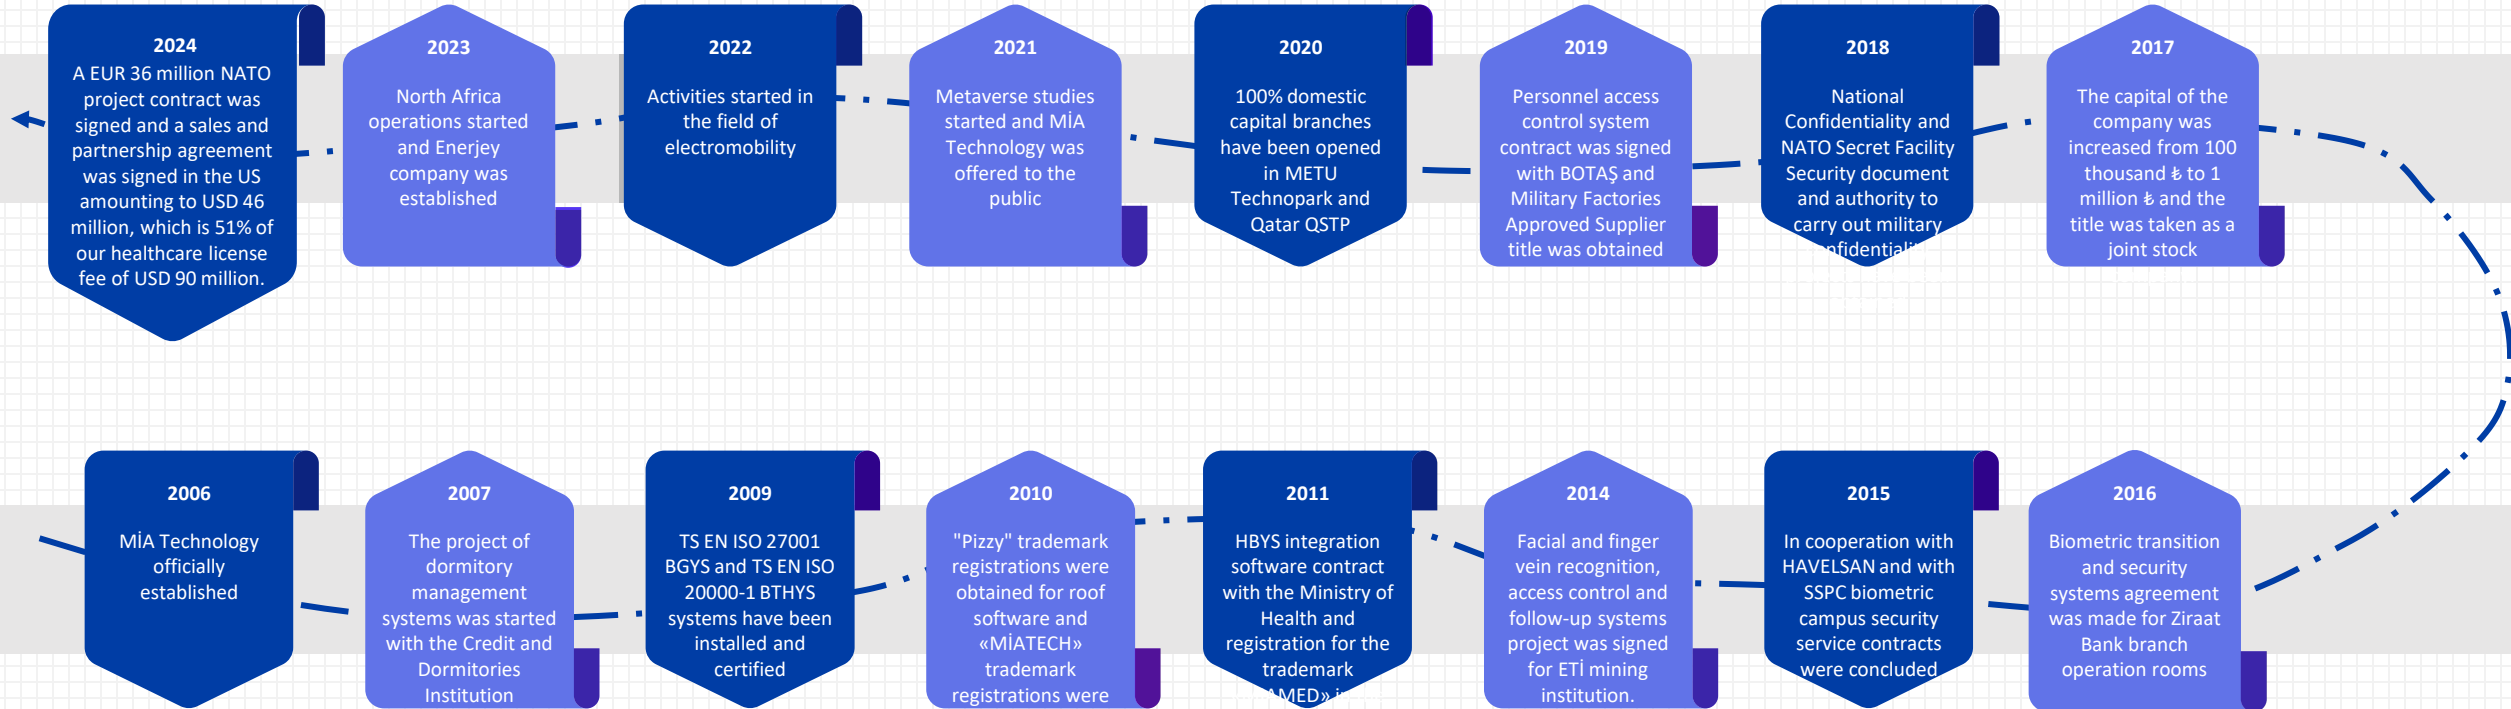

Legal Disclaimer

This presentation reflects the analysis of information and financial statements about MİA TEKNOLOJİ A.Ş. (“MİA” or “the Company”) as well as their views on future prospects in line with the events anticipated by the Company's management in the future. Although the accuracy of the information and analyses given and the expectations are believed to be realistic, depending on the change of the underlying factors of the predictions, the results for the future may deviate from the predictions given here. The Company, the Company's directors or employees, or any other relevant person, shall not be liable for any damages that may arise from the use of the information in this presentation. All statements may contain forward-looking statements, including but not limited to notices made in this bulletin, launches of our new business, operations, financial position and business strategies. Although the Company believes that the expectations reflected in these forward-looking statements are reasonable at the moment, it cannot guarantee that these expectations will be fulfilled correctly. The Company assumes no responsibility or liability for the accuracy or completeness of the information contained in this presentation by its affiliates, board of directors, management, employees or agencies, or any other written or oral information provided to the relevant parties or consultants.

MIA Teknoloji

Milestones

Why MIA Technology?

Experience in the Sector

A strong structure has been formed in many ways with its strong infrastructure and knowledge of different sectors by achieving many first successes of 17+ years.

Strong Growth

Proof of strong financial growth with turnover increase of **64.20%**, net profit growth of **258.15%**, asset growth of **33.62%** in the first half of 2024.

R&D Accumulation

Strong staff and knowledge brought by being an R&D company.

Tailor Model

Presentation of rapid and tailor-made system solutions developed for customer requests.

System Integrator

Being able to operate independent on brands as one of the largest system integrators in its field with its product and experience with strong infrastructure.

AI-powered Solutions

Strong Business Partnerships

Long-term solution partnerships established with proven global and local companies such as NEC, DELL, Axis, Dahua, Megvii Aselsan, Havelsan

Key References

Numerous references have been created with the successful completion of the project, many of which are precedents, and can meet national and international tender requirements with its strong financial and technical infrastructure.

Innovative Technologies

Being able to take effective steps with its existing technical infrastructure in sectors where interest is constantly changing.

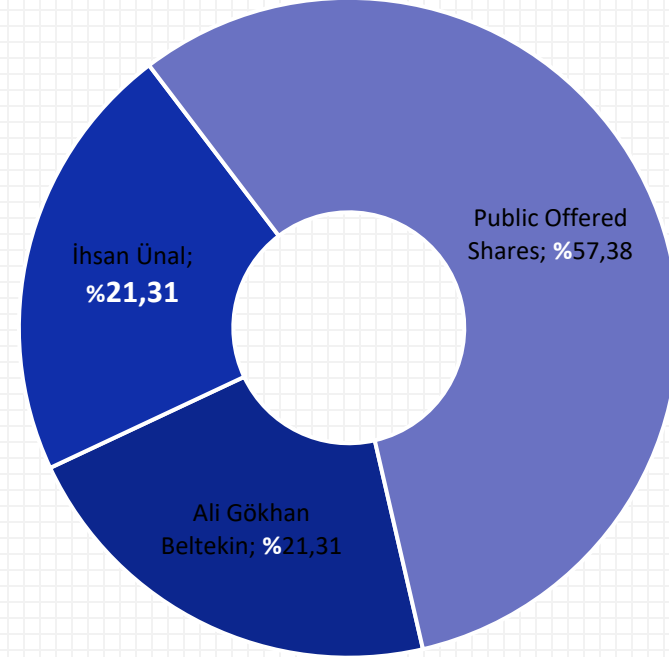

Technopark Development Zone Membership

Income/corporate tax exemption within the scope of R&D & innovation (100%), VAT exemption (100%), SSI employer share discount (50%), customs and stamp tax on certain products (100%) and direct inclusion of the products developed within Technopark in the state Material Office (DMO) catalog.

Shareholding Structure

MİA Teknoloji A.Ş. PUBLIC OFFERING SUMMARY	
Public Offering Date	November 22, 2021
Issued Capital	30.000.000 ₺
Sales by Shareholders	4.500.000 ₺

Always Forward with Strong Partnerships!

Our achievements are underpinned by strong collaborations and solid industry connections. Strategic collaborations with key partners enable us to develop innovative solutions and maintain our leadership in the market. In addition to these collaborations, our memberships in leading clusters in the industry help us build effective networks and keep up with the latest trends.

Strong, Quality and Sustainable

Our NATO Facility Security Certificate offers the privilege of developing specially designed technologies and projects for NATO and the Turkish Defense Industry.

Our Integrated Management System (IMS) is an approach that combines all our activities, processes and management systems under one roof. This system brings together different management disciplines such as quality, environment, occupational health and safety and enables businesses to operate more effectively and efficiently.

We Shape the Future Together!

By actively participating in the calls of leading organizations, we play an important role in the development of innovative projects. These collaborations strengthen our position as a globally recognized actor, while providing the opportunity to continuously learn and grow by following the latest developments in the sector. Our innovation and sustainability-based projects shape our vision for the future and provide value to society.

Featured Project

MIA Teknoloji's Leadership in NATO Project and Turkey's International Success (36 Million EUROS contract)

NATO NCIA Ship-Shore-Ship Buffer (SSSB) Project

MEE Business Partnership was founded by **MiA Technology**, and 2 other **Turkish companies**. NATO/NCIA's Having won the IFB-CO-15577-SSSB tender, the contract was signed in the Netherlands on July 25, 2024.

The project will add **Link 22 technology** to NATO's **air and maritime defense** systems. **HF** and **UHF stations** will be installed and maintained in the UK, the Netherlands and Greece, and the Project will last for **5 years**.

Our consortium of Turkish teams will continue to represent **Turkey** in international projects.

Featured Project

MiA Teknoloji Sells **\$46 Million** License for Healthcare Software to US-Based Investor

Sale of License Rights of Health Informatics Software to US-Based Investor

We transferred our license rights in **health informatics software** to our New York-based subsidiary **MIA Tech Corporation** and sold 51% of our subsidiary company's shares to a US-based investor.

With this agreement, a sales and partnership agreement was signed in the amount of **USD 46 million**, which is **51%** of our healthcare license fee of USD 90 million in the US. With this strategic step, we aim to make **Turkey** a leading center in the **global health technologies market**.

As MiA Teknoloji, with this important investment in **healthcare technologies**, we are increasing **our effectiveness in the global arena** and strengthening **Turkey's leadership** at the global level.

Defense Industry and Defense Technologies

We develop integrated systems based on advanced technology to counter national security threats by providing innovative defense solutions. Together with our strategic partners, we produce sustainable defense projects at national and international level.

- Mine Detection System
- Paramotor Detection and Tracking System
- Drone Detection Radar
- Smart Fiber Optic Sensor (IFOS)

Critical Facility Security and Management

We offer a variety of advanced technologies together to ensure the safety of critical areas, facilities or buildings. By managing these technologies in an integrated manner through a single platform, we facilitate control and provide maximum security. This integration ensures that critical areas are protected at all times with continuous monitoring and proactive security measures.

- Biometric Access Control Systems
- Peripheral Surveillance System
- Anti Drone Systems
- Perimeter Security Radar
- Restricted and Special Authorized Territory Management

Integrated Facility Safety and Management

Our integrated systems, which provide security and management of one or more facilities through a single structure, facilitate integration and operations with existing hardware without the need for new hardware investments. This approach maximizes security by increasing cost-effectiveness and operational efficiency.

- Biometric, card and mobile access control systems
- Camera, sensor secure area management systems
- Personnel attendance control system
- Visitor registration and Authorization system
- Vehicle identification, passage and parking lot management system
- Dining hall and payment management system
- Lighting, air conditioning, and fire fighting systems
- Kiosk, printer and elevator Management systems

Identity Recognition and Verification and Authorization

Equipped with advanced facial recognition technology for facilities and buildings, our integrated identification and verification systems enhance security measures with 1-1, 1-N, and N-N fast face matching and facial quality analysis capabilities. These systems speed up identity verification, ensuring the security of your facilities in an uninterrupted and reliable manner.

- Facial Recognition
- Iris Recognition
- Fingerprint
- Finger Vein Print
- Smart Card
- Mobile Identification

Border Security Management and Perimeter Surveillance Systems

Equipped with climate-resistant cameras and sensors placed in critical areas such as border and base areas, our systems provide early threat detection through our dedicated fusion center. These integrated solutions proactively increase security within the framework of defined rules.

- Territory and border monitoring
- Person Face Recognition and Tracking
- Camera, radar and sensor management
- Monitoring, Early Warning and Information:
- Person Motion Analysis with Geographic Information System Integration

City Monitoring, Surveillance and Analysis

Equipped with advanced security systems for city public safety, our city surveillance solutions aim to create safer living spaces for citizens. These systems significantly improve urban safety with continuous monitoring and rapid response capacity.

- Facial recognition and tracking in crowded areas
- Age and Gender Analysis
- Crowd and anomaly detection
- Data center setup
- Command control and monitoring center setup

Health Information Technologies

Optimizing hospitals' medical, administrative, financial, and legal processes, our services and supply chain solutions strengthen the country's healthcare infrastructure by facilitating integration within the healthcare system. These systems increase efficiency and allow hospitals to operate more effectively.

- It increases the operational efficiency of healthcare professionals and facilitates patients' access to the healthcare system.
- It provides revenue increase with effective services for large bed capacities.
- It manages all the administrative and software needs of hospitals in an integrated manner.
- It offers scalable solutions that are integrated with the country's health systems.

Smart Traffic Control

By monitoring traffic flow in city centers and highways, our systems ensure compliance with vehicle recognition and local inspection rules, increasing traffic safety and reducing transit times. These solutions offer a smoother and safer driving experience with effective traffic management.

- Electronic monitoring system
- License plate, make, model and color recognition
- Smart intersection and signaling systems
- Vehicle instant and average speed detection
- Command and control and data center setup

Shared Electric Vehicle Rental Solution

In order to promote sustainable transportation in cities, we offer users modern and environmentally friendly shared electric vehicle rental services. This service is shaping the future of transportation as an easily accessible and economical option.

- Operating electric bicycle
- Site and Operations Management
- End user and management software
- Integration and installation services

Electric Vehicle Charging Network Operation

In order to reduce carbon emissions and support sustainable transportation, we are establishing a network of Electric Vehicle Charging Stations within our institutions. In this way, we aim for a cleaner world by offering uninterrupted and environmentally friendly charging opportunities to electric vehicles.

- Installation of AC and DC (high-speed) electric vehicle charging stations
- Installation and infrastructure services
- End user and management software
- 24/7 Maintenance & Repair

Sustainability and Zero Carbon

We specialize in sustainability reporting, greenhouse gas emission inventory reporting, and mandatory and voluntary carbon markets. We aim to increase social, environmental and economic sustainability by developing innovative technological projects

- GRI Approved Sustainability Report
- Carbon and Water Footprint Estimation
- Carbon Border Adjustment Mechanism
- Carbon Capture
- Carbon Trading Transactions and Provision of Carbon Certificates

Sustainable Agricultural Practices and Food Safety

We offer innovative solutions in sustainable agricultural practices and food security. We provide technology and consultancy to the agricultural sector through international collaborations and credit registration memberships, and contribute to sustainable food production by reducing environmental impacts.

- Data Management and Artificial Intelligence Decision Support Systems
- Fleet Management and Green Energy Systems
- Sustainable Products and Global Competition

Remote Maintenance Activity with MR (Mixed Reality)

Mixed Reality (MR) technology combines the virtual and real worlds. In remote maintenance, technicians can repair machines without being on-site, reducing costs, saving time, and increasing efficiency.

- Remote Connection
- Highly secure communication
- Online technical support
- Holographic orientations
- Reduce Transit Cost

Video

Metaverse Training Class

Metaverse education classrooms provide interactive and immersive learning with virtual and augmented reality. Students can better understand complex topics with 3D models and simulations and come together without geographical barriers. These classes offers flexible and collaborative learning environment.

- Instructor-specific entitlements
- Practice and exam system
- Scoring with artificial intelligence algorithms
- Interactive Environment
- Location-independent access
- Customize training content and environment

Metaverse Foreign Language Education Application

Metaverse foreign language education applications makes the language learning interactive via virtual and mobile applications. Students improve their language skills by practicing in virtual environments and can engage in cultural exchanges with students around the world.

- Mobile & virtual reality platform
- Foreign language education in 12 languages
- Hands-on training with real-world scenarios
- 24/7 active training classes
- Location-independent access

Maintenance and repair with MR (Mixed Reality)

Technicians can repair machines without being on site and are guided by real-time data. This reduces costs, saves time, and reduces errors.

- Staff training with device manuals
- R&D Studies
- Holographic orientations
- Working on a digital twin
- Artificial intelligence algorithms

Renewable Energy Technologies

By focusing on renewable energy sources, we offer sustainable solutions in the fields of solar, wind, and biomass. We provide technology and consultancy services to reduce environmental impacts and improve energy efficiency.

- Project Development and Engineering
- Procurement and Construction
- Solar Power Plant
- Asset Management
- Energy Storing
- Energy Management Systems
- Finance Solutions & Investment

Cyber Security

In order to protect organizations against cyber attacks and malware, we provide cyber security of organizations with systems using machine learning and artificial intelligence, perform vulnerability analysis and provide cyber security training to personnel.

- End Point Security
- Endpoint Monitoring and Management
- Firewall (Classic, Next Generation and WAF)
- Data Loss Prevention (DLP)
- Log Management and SIEM
- Penetration Test
- Cyber Security Consultancy
- Cyber Security Trainings

Developments in the Metaverse Area

- ❑ We participated in **METATIATIVE LLC**, which was established in the **State of Delaware, USA**, as a shareholder with a rate of 26.10%. Within the scope of metaverse technologies, the company targets activities in the fields of technopark installation, blockchain and NFT, cloud technology, design and simulation.
- ❑ We carry out "**Metaverse Language Campus Project**" with colleges, universities and large companies in the field of Metaverse .
- ❑ Developments are being made within the scope of the Language Acquisition Application, which will be published on international platforms and will serve in 12 languages, supported by the Metaverse and Mobile Application infrastructure.

Developments in the Field of Security

- ❑ Investment plan studies on **biometric authentication** systems are ongoing.
- ❑ We aim to be a partner in technological and hardware transformation within the scope of identity verification service to be performed in public institutions and organizations (health, title deed, notary, bank, etc.).

Developments in Smart Waste Management

- ❑ We are in the process of developing a **Smart Waste Management** project for **Environment and Climate Change**.
- ❑ The **IoT Device**, which we have developed specifically for Garbage Containers, will instantly or hourly measure important data such as "**occupancy, temperature, humidity, location**" in the container and transfer the data to the web portal using cellular connection via GSM/GPRS.
- ❑ It will monitor and **route optimization** of domestic, medical, single and recycled wastes and report the collection service in real time at garbage/street/waste type level. Half will eliminate the collection of empty containers.
